

Iosif Burca

Web Developer

Passionate computer science graduate with a strong technical background, specializing in web technologies, including React, Node.js, MongoDB, HTML5, CSS3, PHP and JavaScript (ES6+). Aspiring to become a proficient web developer, I actively seek new opportunities for growth and self-development.

Beyond coding, I embrace logic, indulge in diverse literary genres, and thrive on crafting innovative web solutions. Excited to contribute my passion and expertise to a forward-thinking team. Let's connect and create impactful experiences together.

- Romanian

Experience

○ January 2023 - Present

Bosch I Blaj

Technical IT

- Took concepts and produced design mockups and prototypes using Figma to strengthen designs, enhance user experiences and improve site interactions.
- Developed full-stack web applications, converting mockups into usable web presence using technologies like HTML, CSS, JavaScript, C# and ASP.NET MVC.
- Discussed site and app requirements with clients to produce actionable development plans and optimize site issues and queries.
- Contributed to a diverse range of internal department projects focused on enhancing team visibility, fostering career development opportunities, and promoting work transparency within the company.

○ July 2022 - August 2022

Halcyon Mobile I Cluj-Napoca

Android Intern

- Worked together with the Android Intern colleagues to build an android app from scratch using technologies like Android Studio, Kotlin and GitLab using Scrum methodologies.
- Contributed ideas and suggestions in team meetings and delivered updates on deadlines, designs and enhancements.

○ June 2022 - July 2022

1 December 1918 University I Alba Iulia

IT Office Intern

- Monitored PCs and components to keep everything in a well-functioning state.
- Identified issues and provided solutions to arising problems.
- Learned new skills in software and hardware maintenance.

Education

October 2020 - July 2023

1 December 1918 University I Alba Iulia

Bachelor's Degree in Computer Science

Thesis

"Web Platform for Educational Games"

Technologies Used

HTML, CSS, JavaScript, PHP, MySQL, Git

Final Grade

9.33
